Ricoh's focus is on **your future**

Our success is measured in your achievements

Our founding principles shape how we do business and guide us with honesty and accountability.

They teach us to embrace challenges through courage and approach everything we do with purpose and agility. They encourage us to break with the status quo to create value without limits. To constantly improve and contribute to the well-being and sustainability of our society.

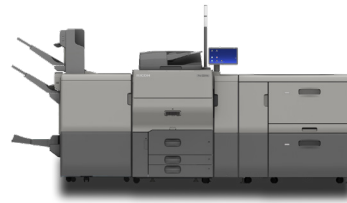

Our commitment to the printing industry has never been stronger. It shows in the wealth of new technologies we are bringing to the market and the services we are providing our customers.

Ask any of our customers and they will tell you that we are actively invested in their success. We not only stand behind our products, we stand with you every step of the way to help you achieve superior results. We constantly seek feedback to align our products and services with what your business needs and provide you with the value-added programs, events and services you will find nowhere else.

Ricoh is proud to offer a full portfolio of products that address the many needs of the production printing industry. These solutions include outstanding hardware, software, finishing and services developed by Ricoh as well as our industry-leading, third-party partners. This all-encompassing approach enables us as a company to drive the future of graphic communications.

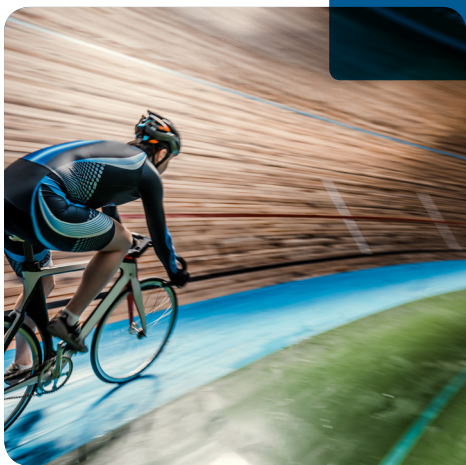

Colour Cut Sheet

Our portfolio of colour cut sheet digital presses lets you produce a broader array of applications, across more substrates and sizes. The award-winning range includes compact systems with high-end performance, 5-colour printers that let you stand out from the competition, and high-volume systems for the most demanding environment. Our experts can help you match the best system and configuration for your printing business to deliver the capabilities you're looking for.

RICOH Pro C5400S/C5410S

Built as a right-sized solution, these impressive systems combine high-quality colour, exceptional media handling and reliable performance in a compact footprint. Offering a range of professional finishing options, powerful controllers and advanced technologies that deliver precise registration and colour consistency, these affordable systems are the total package. Ideal for marketing agencies, in-house print operations, commercial printers, and franchise/print-for-pay environments looking to achieve their productivity and profit goals.

- Prints up to 80 ppm
- Monthly volumes up to 150,000 pages
- 2400 × 4800 dpi resolution with VCSEL Technology
- Print on an almost limitless range of substrates up to 330 x 1300 mm
- Auto-perfect up to 330 x 488 mm and 360 gsm
- 8,550-sheet maximum paper capacity
- Choice of standard Ricoh or Fiery controllers
- Inline, near-line and offline finishing options

RICOH Pro C7500

Do more with a versatile digital press that delivers true production level performance—with the value-add option to run a 5th colour. Featuring enhanced media handling, superior colour consistency and built-in automation, this next-level system opens new avenues for creativity and customisation. Leverage oversized sheet options and tell your customers' stories in engaging and captivating new ways. Benefit from technologies including a 21" Smart Operation Panel with remote capabilities, a robust Fiery controller and an expanded line of inline finishing for true end-to-end productivity.

- Optional 5th Colour Station for clear, white, neon yellow, neon pink, silver, gold and invisible red toner to provide impact and add value to jobs
- Prints up to 95 ppm on all supported stock weights (with Productivity Upgrade option)
- Monthly volumes up to 240,000 pages
- 2400 × 4800 dpi resolution with VCSEL Technology
- Print on an almost limitless range of substrates up to 330 x 1260 mm and up to 600 µm thick
- Auto-perfect up to 330 x 1030 mm and 470 gsm
- 16,200-sheet maximum paper capacity
- Choice of two Fiery colour controllers
- Inline, near-line and offline finishing options

RICOH Pro C9500

Take your business to the next level of profitability with new technologies that drive automation for high-quality, predictable results. Supporting an impressive media range—from 40 gsm up to 470 gsm—this breakthrough digital press offers an unmatched price and performance package, giving organisations the ability to produce long runs cost-efficiently and develop new, high-margin applications. Raising the bar even further is a 21.5" Smart Operation Panel that allows authorised users to view and operate the system directly from a smart device—anytime, any place for ultimate control.

- Prints up to 135 ppm on all supported stock weights (with Productivity Upgrade option)
- Monthly print volumes up to 1,000,000 pages
- 2400 × 4800 dpi resolution with VCSEL Technology
- Print on an almost limitless range of substrates up to 330 x 1260 mm and up to 600 µm thick
- Auto-perfect up to 330 x 1030 mm and 470 gsm
- 18,100-sheet maximum paper capacity
- Choice of two Fiery colour controllers
- Optional automated colour correction and image inspection
- Inline, near-line and offline finishing options

Mono Cut Sheet

Our monochrome cut sheet digital presses deliver exceptionally rich blacks, fine lines and crisp text—on the same substrates as our colour presses. These proven, robust black-and-white workhorses enable you to produce higher-quality books, guides and manuals. Greater productivity and versatility will help you work more profitably.

RICOH Pro 8400S

Designed to deliver high productivity in a compact footprint with the innovation and automation your print organisation is counting on. Supports a broad range of media—including coloured papers—and the finishing options you need to make educational materials, business documents and customer communications crisp and professional. This system increases the ease and efficiency of producing any mono print job.

-
- Prints up to 96 ppm on all supported stock weights
 - Monthly volumes up to 1,000,000 pages
 - 2400 × 4800 dpi resolution with VCSEL Technology
 - Print on an almost limitless range of substrates up to 330 x 700 mm
 - Auto-perfect up to 330 x 700 mm and 350 gsm
 - 8,800-sheet maximum paper capacity
 - Choice of standard Ricoh or Fiery controllers
 - Inline, near-line and offline finishing options

RICOH Pro 8410S/8420S

Power through high-volume monochrome workflows with intelligent automation and an expanded range of inline finishing capabilities to give your business the advantages it needs to succeed. Grow volumes or transition short-run offset work to capture better economics with media support up to 350 gsm as well as options for carbonless paper and oversized coated sheets. With impeccable image quality and the processing power to support highly personalised and data-driven jobs, there's never been a smarter way to drive efficiency and productivity.

-
- Prints up to 136 ppm on all supported stock weights
 - Monthly volumes up to 1,000,000 pages
 - 2400 × 4800 dpi resolution with VCSEL Technology
 - Print on an almost limitless range of substrates up to 330 x 700 mm
 - Auto-perfect up to 330 x 700 mm and 350 gsm
 - 12,600-sheet maximum paper capacity
 - Available as multifunction device (print, scan, copy) or printer-only
 - Choice of standard Ricoh or Fiery controllers
 - Inline, near-line and offline finishing options

Continuous Feed Inkjet

If you're ready to accelerate your operations, look to Ricoh, the authority in inkjet solutions. For more than 50 years, Ricoh has been a pioneer in developing inkjet technologies. Today, our advancements in continuous feed inks and internal technologies combine to give your high-volume print operation an unparalleled advantage.

RICOH Pro VC40000

The RICOH Pro VC40000 features a powerful combination of speed, resolution and ease of use for the transactional, transpromo and direct mail printing markets. This system delivers documents with crisp text and imagery, while separate black and colour printhead arrays allow cost-effective printing of colour and monochrome applications.

-
- Prints up to 150 metres/minute
 - 1 million to 59 million impressions per month
 - Up to 600 × 600 dpi resolution
 - Dynamic variable-drop size technology produces up to three different drop sizes
 - Aqueous-based dye or pigment inks
 - Prints on uncoated, IJ coated, pinless and pin-fed papers from 40 to 250 gsm
 - Paper lengths from 101.6 to 1371.6 mm and paper widths from 165.1 to 520 mm
 - RICOH TotalFlow Print Server R600A supports PDF, PDF/VT and AFP together with JDF
 - Advanced Colour Management support
 - Optional monochrome-only configuration available

RICOH Pro VC80000

The RICOH Pro VC80000 sets a new standard for inkjet quality, productivity and media flexibility. A ground-breaking press that seamlessly bridges the gap between offset and digital, its advanced features ensure remarkable image quality and consistent colour. Developed to help customers accelerate their business with AI-driven automation reducing labour dependency and boosting productivity.

-
- Prints up to 150 metres/minute
 - 1 million to 40 million impressions per month
 - Up to 1200 × 1200 dpi resolution
 - High-density, aqueous-based pigment inks
 - Prints on offset coated, uncoated and IJ treated papers from 40 to 300 gsm
 - Paper lengths from 139.7 to 1371.6 mm and paper widths from 406.4 to 584.2 mm
 - RICOH TotalFlow Print Server R900A supports PDF, PDF/VT, PDF/X, PostScript and IPDS
 - Inline spectrophotometer measures and controls density autonomously
 - Optional Automation Suit for real-time corrections
 - Optional Undercoat Unit for more media flexibility and premium quality

Cut Sheet Inkjet

The next evolution in print, the new B2 cut sheet inkjet press will transform the print industry as we know it. Bridging the gap between affordability and high-productivity media versatility, it will empower commercial printers to create new products and harness the power of digital to offer more value.

RICOH Pro Z75

The RICOH Pro Z75 B2 sheet-fed inkjet future-defining press combines Ricoh-developed technologies and sector-leading capabilities to deliver cost-effective data driven print. The first B2 automatic perfecting sheet-fed inkjet press running aqueous inks has been developed to reflect today's changing commercial print landscape. Supporting highly relevant short runs and the acceleration of offset to digital transformation, it enables commercial printers to discover new ways to reach higher benchmarks for productivity, image quality and flexibility.

- Prints up to 4500 sheets/hour and duplex speed up to 2250 sheets/hour
- Monthly volumes up to 1,700,000 B2 impressions
- 1200 x 1200 dpi resolution at all print speeds
- High-density, aqueous-based pigment inks
- Print on mix of uncoated media 60 to 400 gsm and coated media 80 to 400 gsm
- Auto-perfect B2 plus media up to 585 x 750 mm
- 16,200-sheet maximum paper capacity
- Scalable new generation controller developed in conjunction with Fiery

CAD Large Format

Do you have a need to print large technical drawings? The Ricoh large format printers and multifunction devices allow you to print, scan or copy A1 drawings as easily as an office MFD—in full colour or crisp monochrome. Ideal for the architecture, engineering or construction industry—or any other organisation that has the need to print big.

RICOH IP CW2200

Designed for quick and easy printing of CAD drawings, construction or architecture plans and other wide format documents, the RICOH IP CW2200 delivers precision and quality results at impressive high speeds. With intuitive features for easy operation, durable colour consistency, and RICOH's advanced GEL-JET waterproof ink technology, this is a printer your team can rely on.

- Print large format documents
- Prints up to 2.1 A1 ppm (colour) and 3.8 A1 ppm (B&W)
- Up to 1200 x 1200 dpi print resolution
- Print on a broad range of substrates up to 914 x 30,000 mm, and from 51 to 220 gsm
- Automatic paper roll setting (no need to hand feed the paper)
- Large operation panel uses touchscreen functionality to simplify tasks
- Flat top provides additional work space for operators
- Print straight from USB or SD card

RICOH IM CW2200

Designed for CAD/GIS and entry Graphic Arts applications, the RICOH IM CW2200 has enhanced speed and image quality to help you capture more mono volume and increase colour productivity. Advanced GEL-Jet waterproof ink technology and innovative features such as the Smart Operation Panel and auto nozzle detection, help boost your efficiency.

- Print, copy, scan large format documents
- Copies up to 2.1 A1 cpm (colour) and 3.8 A1 cpm (B&W)
- Scan speed 106.7 mm/second (B&W) and 35.3 mm/second (colour)
- Up to 1200 x 1200 dpi print resolution
- Print on a broad range of substrates up to 914 x 30,000 mm, and from 51 to 220 gsm
- Automatic paper roll setting (no need to hand feed the paper)
- Large operation panel uses touchscreen functionality to simplify tasks
- Print or scan straight from USB or SD card
- Scan to USB or SD card, email, FTP, UR

RICOH MP W6700_{SP}

The ultimate light mono printer for low and mid-range users. Want high-speed output, high resolution and high reliability? Then this new digital multi-function monochrome printer has been created for you. The one device enables you to print and copy in mono, and scan in colour. You can also archive to improve document security and storage plus quickly and easily retrieve archived documents.

-
- Print, copy, scan large format documents
 - Monochrome prints up to 6.7 ppm (A1 horizontal)
 - Scan speed 80 mm/second (B&W) and 26.7 mm/second (colour)
 - Up to 600 x 600 dpi resolution (print and scan)
 - Print on a broad range of substrates up to 914 x 15,000 mm, and from 52.3 to 110 gsm
 - Large operation panel uses touchscreen functionality to simplify tasks
 - Print or scan straight from USB or SD card
 - Scan to USB or SD card, email, FTP, URL

RICOH MP W7100_{SP}

The Ricoh MP W7100_{SP} has been specially created for the needs of CAD and print-for-pay to increase the speed of high-quality output and lower the cost. Its compact design combines the reliability, durability and ease of use that are so essential in today's workplace. All of which helps drive business and profits.

-
- Print, copy, scan large format documents
 - Monochrome prints up to 10 ppm (A1 horizontal)
 - Scan speed 120 mm/second (B&W) and 100 mm/second (colour)
 - Up to 600 x 600 dpi resolution (print and scan)
 - Print on a broad range of substrates up to 914 x 15,000 mm, and from 52.3 to 110 gsm
 - Large operation panel uses touchscreen functionality to simplify tasks
 - Print or scan straight from USB or SD card
 - Scan to USB or SD card, email, FTP, URL

Direct to Garment

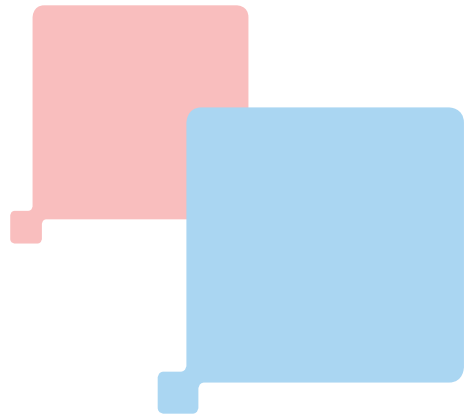

Looking for new ways to broaden your revenue streams? Widen your business scope with on-demand custom printing of t-shirts, hoodies, tote bags and more. The Ricoh Direct to Garment printer empowers users to easily print crisp, high-resolution images in vibrant, eye-popping colour. The possibilities are endless.

RICOH Ri 100

The RICOH Ri 100 is the ideal entry-level Direct to Garment printer for businesses who want to expand the scope of their services with small-lot, on-demand, printed garment services. It offers a safe, compact, all-in-one design, low cost of ownership and easy-to-operate design software. Print one-of-a-kind T-shirts, bags, pillow cases, tea towels, and other personalised garments and memorabilia. Easy operation and easy set-up means you can produce printed garments in almost any location.

-
- Printable area up to 204 x 291 mm
 - Up to 1200 x 1200 dpi print resolution
 - Ricoh drop-on-demand piezoelectric inkjet system
 - Fabrics: 100% cotton to 50% cotton blends
 - CMYK pigment inks
 - Ricoh Design Software and Ri 100 Print Driver

Colour Management

As run lengths decline and customer demands grow more diverse, digital printing has become the new go-to gold standard. This shift brings enormous possibilities to print service providers but it does come with challenges. Achieving precise colour reproduction from system to system, and job to job can be tedious and labour-intensive. Ricoh can help customers overcome the complexities and staffing requirements associated with professional colour management.

RICOH Auto Color Adjuster

The RICOH Auto Color Adjuster is a colour matching system that is so advanced, yet easy to use. It can create ICC profiles in a matter of minutes and allows anyone to produce consistent and accurate colour on any printer from any manufacturer. Match colour from pre-printed samples and run jobs across multiple printing systems—all with precise reproduction results. A colour management solution that helps boost your business to a new level with supreme confidence in colour.

- Professional colour matching in a few simple steps across all of your printing systems
- Fast, time saving and automated colour adjustment
- Daily colour condition monitoring and verification
- Confidently reproduce printed work from unknown sources
- Spectrophotometer reads A3-sized sheets in 40 seconds or less
- Minimum patch size of 6 x 6 mm
- Supports paper weights from 73.3 to 279 gsm
- Sheet sizes from 210 x 210 mm to 330 x 487 mm

Software and Services

Combining a range of Ricoh-developed solutions with offerings from key partners, we provide an integrated approach for all of your end-to-end workflow needs to maximise your efficiency, quality, profitability, and customer satisfaction—no matter what hardware you operate.

Create

Customer Communications Management

Strengthen your relationships and improve the customer experience through the sharing of relevant, personalised information and updates as they happen through print, mobile, web and email communications.

Maintaining consistency of communication, streamlining and automating the creation, delivery and retrieval of communications helps guide customers through their journey, receiving the relevant personalised communications at the right time.

Submit

Client Job Submission

Customers today expect instant satisfaction, including an online experience that provides them what they want when they want it. Organisations want full control of enterprise document printing and costing—and users want easy and efficient job submission, wherever they may be located.

A robust web-to-print solution expands your geographic reach and capabilities to attract new customers, retain existing clients and improve your overall customer satisfaction.

Manage

Job Processing and Scheduling

Order management, scheduling, estimating, capacity planning and fulfilment—your core business functions that require insight into how every person and process is operating.

The ability to collect data from your software, print and finishing equipment in real-time provides you with the confidence to make strategic investments and use your resources appropriately.

Prepare

Pre-press

The slightest tweak on a page or single typo can erase your customer's satisfaction—and your profits—with every touch.

Get more jobs into production faster and accurately by automating essential tasks like job creation, tab setup, page order setup and the assignment of job properties with minimal operator intervention.

Produce

Print Production

Remove the complexities from today's enterprise office and print providers production environments.

The automation of manual tasks, combined with at-a-glance customised dashboards, provide end-to-end visibility, empowering teams to view, analyse, track and trace the entire operation across multiple locations with a single view. Colour accuracy and consistency across all production devices is the key to maintaining brand integrity and customer satisfaction.

Color-Logic

Metallic colour system. Enables creation of eye-catching decorative effects that are easily and inexpensively incorporated into packaging, signage, displays, and collateral—providing product differentiation at every level of a marketing campaign.

ColorGATE Productionserver

Precision colour management system. Modular and scalable colour workflow solution for wide format, large format and DTG printing devices. Enables precise colour control and professional management of printing data across different output systems.

Fiery Backup Services

Protecting your print environment. Downtime can have devastating consequences for print operations. Ricoh developed Fiery Backup Services to help print providers gain the confidence that they can return to production quickly in the event of a Fiery system failure.

Fiery Print Controllers

Print controllers and workflow. Digital front ends and associated software that drive colour and mono print engines. Capabilities available include job management, job automation, colour management, preflight, media management, document makeready, variable data, job processing (RIPping), finishing support and MIS integration.

ePS MarketDirect Cross Media

Customer communication and marketing campaign solution. All-in-one design software that lets you create, personalise and automate marketing for your clients. Connect customer data to marketing communications and personalise the content and conversations.

ePS MarketDirect StoreFront

Web-to-print solution. A customisable e-commerce and web to print platform enabling you to do business with your clients on-line. Offer customers branded portals and catalogues where they can order static and variable printed products as well as non-printed products like apparel.

ePS PrintSmith Vision

Management information system (MIS). Affordable, cloud-based print management software automates key elements in your printing workflow (print estimating, production, accounting, sales management, and e-commerce), reducing touch points, streamlining operations, and optimising business growth.

ePS Quick Print Suite

Digital print management and e-commerce.

Cloud-based solution that combines both ePS PrintSmith Vision—as the core MIS—and ePS MarketDirect StoreFront—providing a digital store front—into one flexible, web-enabled solution that is fully integrated with EFI Fiery Print Controllers. Designed for quick print service providers, in-plant printers and commercial print shops.

Fiery Central

Centralised print production workflow.

Powerful, comprehensive, PDF-based production workflow solution that automates repetitive tasks, customises workflows and intelligently routes jobs for output enabling printers to process more jobs more efficiently.

Fiery Color Profiler Suite

Colour management system. Provides integrated colour management functionality and quality control for printing systems. Extends the colour capabilities of EFI Fiery Print Controllers with advanced colour management tools for profile creation, inspection, editing and colour quality assurance.

Fiery JobFlow

Pre-press workflow automation. Automates job preparation steps in pre-press workflows to produce ready-to-print files, increasing productivity and reducing costs.

Fiery JobMaster

Makeready software. Reduces time spent on complex document preparation. Intuitive makeready includes media assignment, chapter definition, advanced page numbering, fully visual tab insertion and design, finishing, scanning, and powerful late-stage editing features.

Fusion Pro VDP Solutions

Personalised communications software.

Provides a powerful—yet easy to use—suite of tools for the design and production of personalised communications. Enables you to combine customer data with pre-defined templates to produce dynamic marketing pieces that offer highly personalised 1-to-1 communications for improved campaign effectiveness and ROI.

OL Connect

Automated business communications.

Provides a powerful, lights-out automated workflow toolkit that can be configured to provide a complete automated multi-channel business communication solution for corporate customers, print rooms and print service providers (whilst protecting existing IT investments and infrastructure).

RICOH ProcessDirector

Automated workflow management system.

Designed to capture, transform and manage information and processes in ways that can help achieve total output integrity, reduce costs, eliminate errors, increase productivity, streamline a variety of production environments, and increase profitability. Automated end-to-end workflow management solution that is vendor-neutral and scalable.

RICOH Supervisor

Business intelligence solution for print. A cloud-based, vendor-neutral software solution that collects operational data locally from printers, and can be made to collect data from finishing equipment, software, and the shop floor. The solution then illustrates the operational data in user-friendly dashboards for easy access.

Touch7

Extended colour gamut system. Enables users to print and design utilising the maximum gamut of your print engine, as well as extending the colour gamut with neon yellow and neon pink.

Finishing

From cutters and folders to high-speed unwinders and UV coaters, Ricoh has you covered with complete end-to-end systems that improve your productivity, profitability and customer delivery timelines.

Booklet Makers

Highly productive and cost-effective saddle-stitch booklet making solutions from low- to high-volume to meet your full range of finishing needs.

Cutters & Trimmers

Quick and easy cutting solutions provide precision and speed to meet deadlines with pinpoint accuracy to avoid expensive reprints.

Continuous Feed

High-speed unwinders, cutters/stackers, fan folders and rewinders that deliver unsurpassed performance, setup, automation and reliability.

Folders

Eliminate time-consuming folding tasks and reduce error with automated inline and offline solutions for a wide variety of folding needs.

Cover Interposers

Cost-effectively feed preprinted covers and inserts into the finishing workflow.

Folders & Inserters

Automated folding and inserting solutions designed to streamline the process of preparing and sending important business communications.

Creasers

Creasing machines that offer unmatched performance, value, ease of use and quality.

Laminators

A comprehensive variety of roller laminators offering hot and/or cold laminating and encapsulation to efficiently add protection to prints.

Multifunction

Powerful multifunction finishers incorporate cutting, slitting, creasing and booklet making to increase productivity and produce high-quality finished prints.

Slitters

Easy-to-operate slitters deliver precise accuracy to ensure jobs are delivered with efficiency and automation.

Perfect Binders

Create perfect bound books in a wide range of sizes, including unique square and custom sizes to deliver an ultra-professional look.

Stackers

Reduce the time spent unloading output and increase productivity with inline stackers that hold up to 5,000 sheets for long-run jobs.

Ring Binders

Fully automated, inline ring binding systems create professionally finished books right from your desktop or the system's intuitive control panel.

UV Coaters

Enhance the value and durability of your printed pieces with compact, highly productive UV coaters.

Sheet Finishers

Professionally finish thick documents that require stapling up to 100 sheets, while stacking up to 3,000 sheets for continuous unattended runs.

Large-format Cutters

Automate precision cutting for industrial and sign & graphic applications to complete finished products, from rigid displays to promotional items and beyond.

The **Power** of Partnerships

Our portfolio of hardware, software and finishing solutions is comprised of both Ricoh and third-party partner offerings. The philosophy is simple: gather the best choices in the industry for our customers, and make it faster and easier to get access to the very best solution for their specific needs. No matter whose brand you select through Ricoh, we are your single point of accountability to make sure it performs as optimally for you as possible.

Collaboration

Ricoh is your trusted partner—one who shares your goals, understands your long-term vision and is focused on helping you achieve success. We are constantly thinking ahead, innovating and devising new ways to provide you with value and opportunity.

Lean on us to gain a competitive edge.

The print industry is going through a transformation. Maintaining relevance in today's market takes the agility to act on opportunities, while success calls for continuous growth. Ricoh Production Professional Services works closely with customers to identify those opportunities and to implement solutions that drive ongoing improvement with measurable results.

Ricoh's Solutions Consultants ask questions, define objectives and analyse data with an unbiased perspective to recommend the best solutions, delivering ideas and imparting techniques that streamline workflows and help grow revenue through the creation of new products and services.

Our support is what your business relies on.

Uptime is everything when it comes to your printing operations.

With Ricoh, you have peace of mind knowing that a dedicated team of production experts is on call to support you. It starts with a dedicated Ricoh Graphic Communications Support Centre that can be contacted by phone, email or web, ensuring we can service your needs quickly and efficiently—either remotely or by rapid-response technicians.

Our extensive network coverage means we support the diverse needs of all our customers nationwide with the highest levels of service. Our service organisation is trained to deliver the exceptional skills you rely on, and the professionalism you deserve at every touch point.

Maximise your investment.

Your goal is to maximise productivity in your technology investment—and it's our goal too.

Ricoh provides professional on-site training for operators to ensure they are productive from day one. Extensive training will enable operators to optimise output and machine performance, and maximise uptime. Trained operators will be better prepared to tackle any project that comes their way, and they will help your bottom line by streamlining production, and deliver consistent output that will keep your customers coming back for more.

Ricoh Inkjet Technology

Ricoh's inkjet technology is based on more than 50 years of continuous research and innovation. It started out as technology to be used in office printing and is now used in a broad array of commercial applications.

The co-innovation between Ricoh and Original Equipment Manufacturing (OEM), system component, and fluid partners helps to create hundreds of different printers using Ricoh printheads all over the world.

Sustainability in Print

At Ricoh, sustainability isn't just a goal—it's a fundamental aspect of how we operate, innovate, and grow. Through our concerted efforts, we aim to create lasting value for society and the planet, while driving success for our customers and partners.

A commitment to sustainability.

Rooted in our founding principles of “The Spirit of Three Loves”—Love your Neighbour, Love your Country, Love your Work—Ricoch is dedicated to address social and environmental challenges within the communities where we operate. Ricoh has identified seven material issues crucial for sustainable development, including:

- **Zero-Carbon Society:** Ricoh is committed to decarbonising the entire value chain, reducing greenhouse gas emissions and transitioning to renewable energy sources. We provide printing solutions with low environmental impact, and our sustainable practices align with Ricoh's global goal of contributing to carbon neutrality.
- **Circular Economy:** We embrace a circular economy business model, aiming to minimise waste and promote resource efficiency throughout the printing process. By reducing virgin material usage and adopting eco-friendly practices, we contribute to a more sustainable future.

Producing print with minimal environmental impact.

Ricoh is committed to providing products and services that help our customers improve their business efficiency and productivity and—at the same time—significantly reduce greenhouse gas emissions. Through the provision of sustainable products, we contribute to the achievement of our customers' environmental goals.

Ricoh digital printing presses are designed from the outset to minimise energy consumption, thereby reducing CO₂ emissions and helping customers attain their carbon targets. Independent industry credentials—such as EnergyStar and ePEAT—attest to the energy efficiency of Ricoh digital printing solutions.

Low emissions, noise and vibration provide for a safe working environment. Ricoh presses have no special environmental installation requirements, and venting is limited to the high-speed inkjet presses where hot air needs to be expelled outside.

Consumables and supplies for Ricoh production presses are non-hazardous, require no special materials handling requirements, and any waste or spent consumables can be safely disposed of or recycled.

Prints produced on paper using Ricoh production equipment are highly deinkable, maximising recyclability. Paper prints not recycled are safe to be composted, adding valuable nutrients back into the soil.
